## **Ad tech continues to monetise disinformation on the Russia-Ukraine Conflict:**

Ad tech companies, affected brands,

# How we define disinformation

Disinformation is more than **overly simple false dichotomies** like true vs. false or left vs. right.

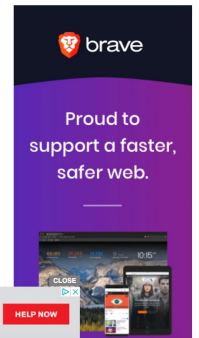

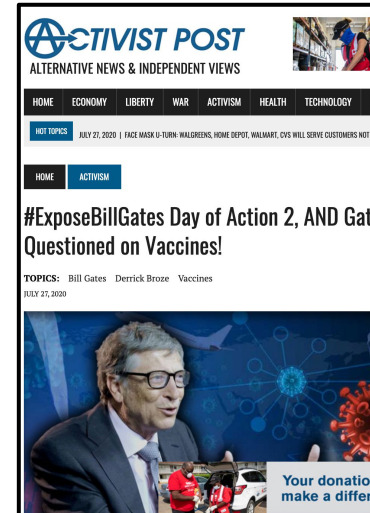

GDI views disinformation through the lens of [adversarial narrative conflict](#). Adversarial narratives:

- Can be implicit or explicit;
- Are intentionally misleading;
- Are adversarial against:
  - at-risk individual or group
  - current scientific consensus
  - democracy and key institutions

**Most importantly, creates a risk of harm**

This definition transcends false binaries and identifies disinformation explicitly by adversarial narrative topic, such as anti-immigrant, misogyny, anti-vax, etc.

**GDI**

# **GDI has studied a selection of popular brand ads appearing next to anti-Ukrainian and anti-Democratic disinformation**

**This deck focuses on harmful adversarial narratives that falsely claim:**

- Neo-nazism is deeply ingrained in Ukraine
- U.S. is helping to develop biological and nuclear weapons in Ukraine
- There was a coup d'etat in Ukraine in 2014
- Ukraine is occupied by a band of drug addicts and Neo-Nazis

**The adversarial narratives have been found across multiple countries and languages (English, French, Serbian and Russian )**

## Popular brands unwittingly funding these stories:

**Ad tech companies servicing these ads & funding these stories:**

# Why more action is needed to defund disinformation

- Despite action taken by some popular brands after Russia invaded Ukraine, ad tech companies continue placing ads featuring well known brands next to disinformation related to the conflict in Ukraine
- The responsibility to protect human rights is a global standard expected of all companies wherever they operate ([UN Guiding Principles on Business and Human Rights](#))
- Where companies have not responded adequately to conflict or fragile situations, some of their failure has facilitated widespread human rights abuses ([UN Report of SR on promotion and protection of the right to freedom of opinion and expression](#))
- On 10 March 2022, the Chair of the European Parliamentary Special Committee on Foreign Interference including disinformation and MEPS demanded platforms move from voluntary measures to a set of basic rules to develop a structural approach to disinformation within the future Digital Services Act.
- Whilst the UK, EU and U.S. sanctions are welcome, they have not defunded harmful anti-Ukrainian and anti-Democratic disinformation on the open web.

**An urgent, long-term and industry-wide solution is needed to end the monetisation of harmful disinformation**

“As the Russia-Ukraine war wages on, the invasion will certainly serve to embolden Neo-Nazi factions from militia's to political parties throughout the whole of Ukraine. While Azov Battalion currently takes center stage, the origins of its founder and his allies show that a national socialist sentiment is deeply ingrained in Ukrainian politics. With the election of national socialist politicians in the past and continued sanction of their political and military operations, it's clear that Neo-Nazism in Ukraine is far from a Kremlin sponsored piece of propaganda.”

The former US Congresswoman Tulsi Gabbard Sunday posted a video on Twitter reiterating claims about US-funded Biolabs in Ukraine. Expressing concerns over the "inadvertent or intentional" breach of these dangerous pathogens, Gabbard called for an immediate ceasefire around these US-funded laboratories in Ukraine.

In a two-minute video, Gabbard said there are 25 to 30 American-funded biological laboratories in Ukraine and called for an immediate ceasefire at the laboratories as they could spread dangerous pathogens.

"Interestingly, on Tuesday, the US State Department official Victoria Nuland in a way had admitted that US-funded Biolabs are working on developing bioweapons on Ukrainian soil. Nuland testified before a Senate Foreign Relation Committee hearing on Ukraine in Washington, DC, and said that the United States was working with Ukraine to prevent invading Russian forces from seizing biological research material. The State Department also stated that it was concerned that Russian forces are trying to gain control of biological research facilities within Ukraine.

By stating that Russia will be held responsible for any 'biological or chemical weapon attack,' Nuland had effectively admitted what the Russian government has been saying all along: that US-funded Biolabs are developing bioweapons on Ukrainian soil."

The U.S. triggered a coup d'état in Ukraine in 2014, overthrowing the democratically elected president who was Russia-friendly and installing a pro-Western, pro-NATO leader. Putin has had his eye on Ukraine ever since but dared not do anything when Trump was in power because he feared and respected Trump.

So Putin in the meantime brilliantly helped move along a green revolution in Germany and elsewhere in Europe, leaving Europe, with its wind farms and solar panels, hungry for more energy, which it bought from Russia in the form of natgas.

Trump's right: Putin is a genius. Unfortunately, we seem to be in a historically rare period in which the leaders of 1.5 billion people — i.e., the West — are to a people feckless, obtuse, senile, or some combination of the three.

Now that we have President Potted Plant in office, Putin has made his move. By the way, the story is that Russian annexed Crimea some years ago. Putin's version is that the Crimeans had a plebiscite, and over 90% voted to leave Ukraine and join Russia. That alone should give you an idea of what a dysfunctional country Ukraine is.

Putin has no intention of "reconstituting the Soviet Union." That's a big fat lie. This war is the West's fault, not Putin's. At any time, we could have discussed these issues with him. Instead of seeking closer ties with Russia (as Trump was attempting — he even talked about disbanding NATO, since Russia is no longer a territorial threat to Europe), we constantly antagonize Russia with our NATO expansion.

MONTÉE DES TENSIONS (10) - DÉGÂTS COLLATÉRAUX

## Israël abasourdi par les néo-nazis ukrainiens

par Thierry Meyssan

La présence organisée par l'État de néo-nazis au sein de l'armée ukrainienne n'est pas anecdotique, même s'il n'est pas possible de la quantifier de manière certaine. Il est par contre aisé de dénombrer leurs victimes. Dans l'indifférence générale, ils ont tué 14 000 Ukrainiens en huit ans. Cette situation est l'une des causes de l'intervention militaire russe en Ukraine. Israël se trouve confronté pour la première fois à ce qu'il n'a jamais pu imaginer : le soutien de son protecteur US à son ennemi historique, le nazisme.

By evoking a band of drug addicts and neo-Nazis in power in Kyiv, President Putin shocked many. The Atlanticist press tried to portray him as mentally ill. However, the facts are there: power in Ukraine is indeed occupied by a gang of drug addicts who have stolen the gas revenues. A race law was passed. Monuments to Nazi Collaborator Stepan Bandera have been erected. And two Nazi battalions have already been incorporated into the regular army.”

## Ministarstvo odbrane Rusije objavilo dokument kojim se potvrđuje učešće Pentagona u finansiranju bio-laboratorija

pre 5 dana • - Milena Stojaković

**“The Ministry of Defense of Russia published a document from March 6, 2015, which confirms the participation of the Pentagon in the financing of military-biological projects in Ukraine. According to the agency, the money was received by the laboratories of the Ukrainian Ministry of Defense in Kyiv, Odesa, Lviv and Kharkiv, a total of 32 million dollars.”**  
[...]  
“These biolaboratories were selected as the executors of the project to study the causes of hemorrhagic fever in the Crimean Congo, leptospirosis and hantavirus, since these pathogens have natural foci in Ukraine and Russia - and their use can be disguised as a natural outbreak, according to the Ministry of Defense.”

Poštovane kolege, dobar dan!

Našem sastanku prisustvuju šefovi Vlade, opunomoćeni predsednika u federalnim okruzima i šefovi ruskih regiona.

Sastajemo se u teškom trenutku kada naše Oružane snage izvode specijalnu vojnu operaciju u Ukrajini i Donbasu. Podsećam da sam na samom početku, u rano jutro 24. februara, javno i otvoreno naveo razloge i glavni cilj dejstava Rusije. To je pomoć našem narodu u Donbasu koji je skoro osam godina najvarvarskim metodama - blokadom, velikim kaznenim akcijama, terorističkim napadima i stalnim artiljerijskim granatiranjem - bio podvrgnut pravom genocidu. I zašto? Samo zato što su tražili elementarna ljudska prava - da žive po zakonima i tradiciji svojih predaka, da govore svojim maternjim jezikom, da vaspitavaju svoju decu kako oni žele. Istovremeno, kijevske vlasti ne samo da su ignorisale, sabotirale svih ovih godina sprovođenje Minskog paketa mera za mirno rešavanje krize, već su krajem prošle godine čak i javno odbile da ga sprovedu.

But we are convinced once again that the Kiev regime, to which its Western masters have set the task of creating an aggressive anti-Russia, is indifferent to the fate of the people of Ukraine itself. The fact that people are dying, that hundreds of thousands, millions have become refugees, that a real humanitarian catastrophe is happening in the cities held by neo-Nazis and their armed criminals released from prison, they don't care.

Целью российской военной операции на Украине является избавление от совершенного против Донбасса геноцида. Об этом заявил президент России Владимир Путин в ходе выступления на концерте-митинге в «Лужниках» по случаю годовщины воссоединения Крыма и Севастополя с РФ.

«Именно [намерение] избавить людей от этих страданий, от этого геноцида и является основной, главной причиной, побудительным мотивом и целью военной операции, которую мы начали в Донбассе и на Украине. Именно в этом цель», — сказал Путин.

Говоря о Донбассе Путин процитировал слова из Священного Писания: «Нет больше любви, как если бы кто-то отдал душу свою за друзей своих».

«Эти слова из Священного Писания христианства, из того, что дорого тем, кто исповедует эту религию. Но всё заключается в том, что это универсальная ценность для всех конфессий России и именно для нашего народа», — отметил президент.

Глава государства также отметил героизм российских военных, которые действуют «сплоченно».

This was stated by Russian President Vladimir Putin during a speech at a concert-rally in Luzhniki on the occasion of the anniversary of the reunification of Crimea and Sevastopol with the Russian Federation.

‘It is [the intention] to save people from this suffering, from this genocide, that is the principal, primary reason, motivation and goal of the military operation that we launched in Donbas and on Ukraine.
