Ad Tech + Brands on Coronavirus Disinfo Sites:
4 - 8 May

GDI Global Disinformation Index

8 May 2020
GDI has studied a selection of conspiracy stories and sites spreading disinformation about the coronavirus

Conspiracy theories:

- COVID-19 vaccine is ready.
- There is no need to have a lock-down.
- Country and state lockdowns are only to grab greater powers.
- COVID-19 is linked to 5G technology.
- Immigrants are spreading COVID-19.

All stories found on known disinformation sites.
Ad tech serving & funding these sites & stories:

Google  REVJET  revcontent

amazon.com  criteo

AdRoll  The Reach Group  Digital Performance

Outbrain  Teads  Taboola

Note: Some of these companies include retargeting and data analytic companies serving the “last mile” for delivering online ads.
Brands funding these sites & stories:
Brand Advertisements

- All of these brands were found on the sites queried.
- Brand ads will vary by anyone’s data footprint & geolocation.
- Screenshots taken from locations in US and Germany.
- Given EU data protections, most ads provide clickable information on the company providing ad.
- This is what has been used to map these specific ads to the ad providers.

Gov Gavin Newsom Sued Over $75 Million Stimulus For Illegal Aliens

From DAILYCALLER.COM
A lawsuit seeks to stop Democratic California Gov. Gavin Newsom from doling out roughly $75 million in taxpayer funds to foreign nationals living unlawfully in the country.

Judicial Watch, a conservative legal firm, filed a temporary restraining order against Newsom to keep him from spending about $75 million of state taxpayer funds to direct cash benefits to illegal aliens.

According to the country’s top scientists, they are now well underway to achieving natural herd immunity. It seems this particular Nordic model has already won the debate.

Because Sweden decided to follow real epidemiological science and pursue a common sense strategy of herd immunity, it doesn’t need to “flatten the curve” because its strategic approach has the added benefit of achieving a much more gradual and wider spread.

Anders Tegnell, Sweden’s government advisor for epidemiology explains, “We are all trying to keep the spread of this disease as low as possible, mainly to prevent our healthcare system from being overstretched, but we have not gone for the complete lockdown. We have managed to keep the number of cases low enough so the intensive care units have kept working and there has always been 20 per cent beds empty and enough protective equipment, even in Stockholm, where there has been a huge stress on healthcare. So in that way the strategy has worked.”

Similarly, it doesn’t have the deal with the newest “crisis” obstacle which lockdown states seem to be using as an excuse not to reopen society and the economy, which the fear of a “second peak” which governments are telling the public will wreak havoc on the nation by “infecting the vulnerable” and will “overwhelm the health services” if everything is suddenly reopened and social isolation and distancing is relaxed.

This catch-22 which countries like the US and UK are caught in is predicated on the belief that the country can suddenly unleash itself again on the populace. Certainly, there could be a second surge, but should this be the only result of the decision to impose lockdown in the first place. According to top epidemiologist Knut Wiklund, the decision to lockdown only delayed the inevitable for countries like the US and UK: whereas the COVID-19 problem was less serious there and had previously been in the short to medium-term much worse, the long-term results would be relatively the same proportionally in term of human casualties.

The paper should now undergo formal peer review, which is taking place in Oxford BoConcept Cat.

Why Sweden Has Already Won The Debate On COVID-19 "Lockdown" Policy

by Tyler Durdin
Sun, 05/03/2020 - 07:00

Authored by Patrick Henningson via 21stCenturyWire.com,

As Europe and North America continue suffering their steady economic and social decline as a direct result of imposing "lockdown" on their populations, other countries have taken a different approach to dealing with the coronavirus threat. You wouldn't know it by listening to western politicians or mainstream media stenographers, there are also non-lockdown countries. They are led by Sweden, Iceland, Belarus, Japan, South Korea and Taiwan. Surprisingly to some, their results have been as good or better than the lockdown countries, but without having to endure the socio-economic chaos we are now witnessing across the world.

For this reason alone, Sweden and others like them, have already won the policy debate, as well as the scientific one too.

Unlike much of the rest of the world who saw fit to unquestioningly follow China's lead on everything from quarantining, to economic shutdowns, to contact tracing, and PCR mass testing, nonlockdown countries have instead opted for a somewhat lighter touch – preserving their economies and societies, and in doing so avoiding an endless daisy chain of new problems and obstacles deriving directly from the imposition of brutal lockdown policy.

On the European front, the Scandinavian country of Sweden is now garnering more attention than before, and has become an object of both criticism and fascination for those against or in favor of lockdown policy. While countries like the United States and Great Britain continue to top the global tables in terms of COVID-19 death tolls, Sweden has only suffered marginal casualties in comparison, while avoiding the intense strain on society and loss in public confidence which lockdown governments are now grappling with as they continue to push their populations to the limits of social stress and economic tolerance. You could say those governments are already careening over the edge by looking at the latest jobless figures coming out the US with 30 million new people filing for unemployment in the last few weeks.

How To Create Your Very Own Fake Pandemic

So you want to create a fake pandemic, huh?

You’ve come to the right place! Today we offer all budding control freaks, fearmongers, warmongers, Machiavellian social engineers, psychopaths and Satanists a wonderful and elaborate step-by-step guide for how you can create your very own fake pandemic. Before we begin, please ensure you own some portion of the mass media/MSM – you’ll need it to relentlessly broadcast the narrative I’m about to reveal. Other prerequisites include owning stocks in vaccine companies and having access to ‘soul-for-sale’ scientists whose brains you can buy to publish whatever results you want (Gates Foundation gives $79 million to Imperial College in England). You know – the kind of scientists and shills who will reliably ‘find’ the right result that bolsters your propaganda. Got those in place already?

Then you’re all set! Let’s begin.

Why Sweden Has Already Won The Debate On COVID-19 "Lockdown" Policy

By Tyler Duden
Sun, 31/01/2020 - 07:00

As Europe and North America continue suffering their steady economic and social decline as a direct result of imposing "lockdowns" on their populations, other countries have taken a different approach to dealing with the coronavirus threat. You wouldn't know it by listening to western politicians or mainstream media sycophants, there are also non-lockdown countries. They are led by Sweden, Iceland, Belarus, Japan, South Korea and Taiwan. Surprisingly to some, their results have been as good or better than the lockdown countries, but without having to endure the socio-economic chaos we are now witnessing across the world. For this reason alone, Sweden and others like them, have already won the policy debate, as well as the scientific one too.

Unlike much of the rest of the world who saw fit to unquestioningly follow China’s lead on everything from quarantining, to economic shutdowns, contact tracing, and PCR mass testing, non-lockdown countries have instead opted for a somewhat lighter touch – preserving their economies and societies, and in doing so avoiding an endless dairy chain of new problems and obstacles deriving directly from the imposition of brutal lockdown policy.
COVID-19 and the Rise of the Police State

By David Skippac
Global Research, April 28, 2020

In December 1917, Europe was immersed in the First World War—one of the most vicious, insane wars the world had ever witnessed. After learning about the high casualty toll and the horrific nature of trench warfare, which included the use of poison gas, Britain's prime minister, David Lloyd George, confided in a private conversation to C. P. Scott, editor of the Manchester Guardian:

"If people really knew [the truth], the war would be stopped tomorrow. But of course, they don't know, and can't know."

Just over a century later, here we are, yet again, immersed in a global war. However, this war, which is ostensibly sold to all of us as a battle to "stop the spread of the coronavirus," is in reality a war devised by "the powers-that-shouldn't-be" to remove the last remnants of humanity's inherent freedoms and liberties.

And, just like all of the previous criminal wars throughout human history—the First World War, the Second World War, the Korean War, the Vietnam War, and every other subsequent conflict—if people around the world knew the truth about this war, it would come to a screeching halt overnight.
