UK finds testing kits contaminated with Coronavirus

Last week, the UK disclosed that key components of the coronavirus testing kit the UK government had ordered from overseas were contaminated with the coronavirus itself! On Monday, the 30th of March, 2020, laboratories across UK were warned that there would be a delay in the delivery of "probes and primers."

It was reported that the testing kits were sent from China and were found to be contaminated with the coronavirus when they were being surveyed by a Luxembourg-based company, Eurofins Scientific.

Eurofins admitted to the contamination saying, "We are aware that contaminations of the nature you mentioned have been observed by several primers and probes manufacturers around the world after they produced SARS-COV2 positive controls. "Those initial problems can be easily resolved by proper cleaning and production segregation procedures."

A positive control enables assessment of new test's ability to detect a

Are Deep State Satanists being Arrested under Cover of Defender Europe 20 Exercises?

Written by Dr Michael Salla on March 21, 2020. Posted in Deep State, Featured

While much of Europe has been closed off due to the Coronavirus pandemic, elite military forces from 17 NATO and partner countries are using the Defender Europe 20 Military Exercises as a cover to arrest Deep State Satanists entrenched in fortified European compounds, according to a New York Times best-selling author. David Wilcock made his startling claim in his latest video live-streamed on March 19, to his 288,000 YouTube followers.

In his video presentation, Wilcock cites at length a March 15 English language summary of an article by Manlio Dinucci, who wrote about the Defender Europe 20 Exercises on March 3 for the Italian web newspaper Il Manifesto. The March 15 article summarizing Dinucci’s earlier Italian language article is titled “30,000 American Troops Arrive in Europe Amidst COVID-19 Crisis”, and begins as follows:

Manlio Dinucci writing in the Italian web newspaper, Il Manifesto on March 3rd, 2020, reports that despite Trump’s travel ban 20,000 American troops will be traveling to Europe in the next few days: joining the 10,000 already there.

Despite the travel advisories issued by the U.S. State Department for Americans traveling to northern Italy and elsewhere in Europe, Dinucci is again cited from his original March 3 article:

However, one category of U.S. citizens is exempted from these rules: the 20,000 soldiers beginning to arrive from the United States in European ports and airports for the Defender Europe 20 exercise, the largest U.S. troop deployment in Europe in the last 25 years. Including those already present, about 30,000 U.S. troops will participate in April and May, flanked by 7,000 troops from 17 NATO member and partner countries, including Italy.

The author of the English language article citing Dinucci, who uses the pseudonym, Popolillo, subsequently points out:

None of these troops have been issued with Bio/Hazchem suits or masks, which seems a little reckless of the American government if COVID-19 is really the threat that we are...

"У вас есть 4 дня": предложен новый метод для профилактики заражения коронавирусом

Согласно предложенному совету, от заражения инфекцией свои органы можно дополнительно защитить, принимая два препарата: голень и растворы.

Насколько это применимо к китайской инфекции COVID-19, доказательств пока нет. Сообщается, что если вы заражены коронавирусом, то в первые несколько дней еще до того, как инфекция укрепится в вашей дыхательной системе, с зараженной крови можно бороться, используя такие средства, как соляные растворы.

До того, как коронавирус достигнет легких, он остается в горле в течение четырех дней. В это время человек начинает кашлять и испытывать боли в горле. Если вы будете пить много воды и полоскать горло теплой водой с солью или лимоном, то...
