Popular Brands Appearing Next To Anti-Vax disinformation
GDI has studied a selection of popular brand ads appearing beside anti-vaccine disinformation.

This deck focuses on stories that have adversarial narratives about:

- COVID-19 vaccines are “experimental” and deadly.
- COVID-19 does not exist and there is no need for a vaccine.
- COVID-19 is just a flu and vaccines are more dangerous than the illness.
- COVID-19 vaccination mandates are putting people’s health at risk.
- COVID-19 vaccines are unproven and side effects are too risky.
- “Global” elite are pushing COVID-19 vaccines as part of their “reset” agenda.

The vaccine-happy feds are going to chase you down in your home

By Andrea Widburg

We've learned a great deal in the past year. When it comes to COVID, for those who are neither old nor sick, COVID is another flu. For those who are young, COVID is almost meaningless. And when it comes to the vaccines, while their efficacy is still questionable, it appears that if you're young or already have COVID antibodies, the vaccines can be more dangerous than the illness itself. Oh, and the Biden government wants badly to control you. On that last point, the latest evidence is the administration's promise that it's going to hunt unvaccinated people down, door to door.

It started with Jen Psaki, who reminds me more and more of a scary Germanic schoolmistress in some vaguely BDSM flick. She informed the press on Tuesday that the federal government will soon be going door to door to find people who have not yet gotten vaccinated:

- Inflicting the same kind of tyranny
- Shouting toward dictatorship
- China becomes a maritime bully

Meanwhile, Dr. Fauci tells reporters that nine out of ten Americans who died from the virus were unvaccinated. Despite the growing number of vaccinated patients who are being infected and seriously sickened, insisted that the "science" shows the vaccines are extremely effective at preventing infection.

The logic is confusing, but it goes something like this: Delta is scary, so get vaccinated...but vaccines don’t protect against Delta. It’s just the latest reminder that Dr. Fauci & company don’t care about "the science". They’re here to protect the narrative and the reputation of the vaccines, or else risk undermining the White House.
What’s more, the delta variant was also found to be resistant to antibody-based treatments, like “bamlanivimab”, the monoclonal antibody cocktail produced by Eli Lilly.

The Truth About the ‘Vaccine’

As of this moment more than 10,000 people in the EU have died as a result of getting the “covid19” vaccine. But this is an extremely conservative estimate, and it is probably at minimum double this amount and probably much more. In the USA more than 5,000 people have “officially” died from getting the “covid19” vaccine and many reputable people in the medical profession as well as highly respected virologists and infectious disease specialists are saying that it is more likely that anywhere from 50,000 to ½ million people are likely to have died in the USA thus far from getting “covid19” vaccines.

Have you seen any of the videos of real people (of which there are many, many, many) shaking uncontrollably (and whose shaking does not stop) or suffering greatly in a myriad of other ways following the injection of artificial and extremely harmful chemicals into their once natural bodies?

I hope that you realize independent thinking mass media to “democratic natural immune system”.

And, incidentally, this — I just found out that a woman I know who is an eye doctor in Graz and who never had any heart problems or any heart related problems got both covid19 vaccines a couple of months ago. And guess what?? This woman who is in her early-50s and who never had heart problems or heart-related problems just had a heart attack. (Hmmm . . . just a “coincidence,” no???)

And guess what else?? One of the main ADVERSE REACTIONS to “covid19” vaccines are heart and blood circulation problems and recently a major scientific institution (the famous Salk Institute in the USA) has come out with a study providing very credible evidence that “covid19” is a VASCULAR and not a RESPIRATORY disease. Many of the adverse reactions are: (1) Heart failure or at minimum heart inflammation, (2) blood clots and (3) a range of other blood circulation problems.

The answer is that all the doctors and nurses are not vaccinated, do not believe in the extent of the “pandemic” or the hyped threat of Covid—indeed, many regard the hype and vaccine as greater threats than Covid—and the adverse effects of the vaccines are showing up. The believers in the narrative just do not know it because the pharma scum suppress the information and do not report it unless to ridicule and denounce it as “disinformation.”

All doctors and nurses are not vaccinated. For example, here is a report of an entire hospital—200 doctors and 1,500 nurses—on strike in protest of the Macron nazi’s attempt to force them to be vaccinated.
How College COVID Vaccine Mandates Put Students In Danger

The excessively narrow medical exemptions for COVID vaccine mandates at many colleges put students at unnecessary risk of serious complications, including hospitalization and death.

We think that these mandates are unethical, chiefly because they indiscriminately require administering an experimental biological agent in the setting of a clinical investigation to a population that is at greater risk of harm from the drug than from COVID. Our advice to schools that have not yet adopted vaccine mandates is: don’t.

The Cornell website’s reply to whether students should get vaccinated even with a prior infection is “Yes.” Notre Dame made this especially clear when summer school opened. At first, the university website said that “lab results showing your immunity” would be acceptable proof of a vaccine. Then it abruptly changed. It now states that “lab results showing your immunity...does not include Covid 19 antibody testing.”

The numbers of vaccine injuries and deaths are huge. In any situation other than the current fake pandemic, the vaccination program would have been stopped. Cancelled

Question: How dangerous is the Delta Variant?

Answer: There is no Delta Variant. Because there is no original SARS-CoV-2 virus.

Question: Why are we hearing that the majority of new cases of COVID-19 are occurring in the unvaccinated?

Answer: “A case” means a positive PCR test. The test doesn’t detect a virus. There is no virus. But since people who test positive are called cases...think it through. People who have been vaccinated are far less likely to get tested than people who haven’t been vaccinated. Therefore, it’s going to look like “most new cases” are occurring in the unvaccinated.

While the fear propaganda may be working throughout the world, Americans are beginning to reject the terror that has been instilled into them by the elites. This has the globalist establishment very worried."

The COVID vaccine regime seems to align perfectly with dark prophecies of a new world order that runs roughshod over the rights of the individual. There may not be very much more time for free humanity to resist this satanic technocracy.
Men continue to listen to the lying politicians, the useful idiots in the Mockingbird media and the corrupt CDC and WHO instead of trusting in the living and true God. The latest example of someone who willingly goes along with the narrative, to his own destruction I might add, is a 33-year-old man from New York who mocked “anti-vaxxers” by calling them “idiots” and “morons.” After getting “fully vaccinated,” he’s now dead inside of 3 months.

Horrific vaccine “adverse events” BEFORE & AFTER Covid-19 jabs, right from the CDC’s very own vaccine injury tables

(Natural News) From the sound of it, vaccines are like biological weapons that destroy human health and should all be completely banned until proven safe and effective by multiple independent labs running rigorous tests and extensive clinical trials. Within hours and days of being injected with harmful substances, recombinant DNA, mRNA and genetically mutated viruses, human beings, including babies and children, are being assaulted, maimed and killed by vaccines that are dirty and dangerous.

Further, the group warned, "Long-term effects of these novel, genetically engineered products cannot possibly be known at this point. These could include autoimmune disorders, antibody-enhanced disease, infertility, cancer, or birth defects."

The statement continued, "Moreover, the benefit to the public in this instance is purely hypothetical. Uninfected persons cannot transmit infection just because they are unvaccinated. Vaccinated persons can still infect others. Many medical workers already have natural immunity, and mandated shots impose risks without little or no benefit, yet there is no provision to exempt them."
EDITOR'S NOTE: Americans are just starting to discover that much of what they thought they knew about the COVID-19 pandemic has been a lie. At the same time, the reality of safe, effective, inexpensive and readily available medications that can both treat and prevent COVID infection – successfully used all over the world – has been ruthlessly suppressed at every turn. But the truth is finally emerging, and is explored in-depth in the latest issue of WND’s acclaimed monthly Whistleblower magazine, titled “ENDING THE PANDEMIC: How vaccine mania and lust for power led to the all-out suppression of proven safe-and-effective COVID treatments.” “ENDING THE PANDEMIC” is available both in Whistleblower’s much-loved print edition and in state-of-the-art digital form.
